# Multiple Graph And Chart UI Pack

Use Steps:

1.Check whether the canvas resolution is 3840 * 2160. If not, set it to this resolution to display all assets correctly

2. Open the following folder:

Project/Assets/Multiple Data Visualization Resources/Scenes

There are 8 scenes here. Select any scene you want to view and double-click it to open it

3. Double click the "play" button to start running the scene, so you can see the dynamic effect of the scene.

4. If you don't want to use the default scene directly, you can find the individual prefab you want to use in 'project / assets / multiple data visualization resources / prefabs', and then drag it to your project scene.You can freely combine and use all the elements.
